- HTML
- CSS
- Sass
- Bootstrap
- Material UI
- JavaScript
- JQuery
- React.js
- Redux & Redux Toolkit
- Git & Github
- Node.js
- MongoDB
- Express.js

EXPERIENCE

Social Media

enable users to create profiles, connect with friends, share posts, and engage with content through likes The application utilizes MongoDB for data storage, Express.js for server-side logic, React.js for dynamic user interfaces, and Node.js for backend development, ensuring a seamless and responsive user experience.

Tours

allows users to browse and book tours, leave reviews, and manage their bookings. The application leverages MongoDB for database management, Express.js for handling server-side logic, React.js for creating interactive interfaces, and Node.js for backend operations. It offers users a responsive and engaging platform to explore and book travel experiences seamlessly.
